

The Climax of Corona Virus!

Part 2 of 2

Overview:

Astrological predictions may not be an outcome of mere applying book knowledge on to a subject and interpret the effects of planets on the basis of position of planets in the Zodiac. If a rule-book on Astrology could give predictions, then anyone can, might as well use a software for this. It is a subject of Artistic Science, and at times, requires wild imagination out of reasoning and there is always an unidentified element of Clairvoyance and this can never be estimated or quantified.

Recap:

Regarding Corona Virus, I have covered the following points in my articles already posted:

1. Chronology of eruption of Corona through my Astrological analysis and dates given my me syncs with the dates known to the entire globe from the media vide the link - <https://www.enlighten-mind.com/blog/my-take-on-corona-virus-and-its-impact-in-india/>
2. I have explained through Astrology, with dates, the nature of the Virus and how it gets spread vide the link - <https://www.enlighten-mind.com/blog/renew-fighting-the-global-terrorist-corona-virus/>
3. I have also dealt with the situation that we are in as on March 29, 2020 and given predictions with dates about the future impact of the pandemic and how it will recede vide the link - <https://www.enlighten-mind.com/blog/good-bye-corona-virus-part-1-of-2/>

Synopsis of Part 2 of 2

In this article I am analyzing the possible aftermath of the pandemic. Since Rahu, the causative planet for the pandemic transiting in an Airy sign Gemini, engulfed the globe with the Airborne disease. The Zodiac sign Gemini is the 3rd sign of the Zodiac representing lungs, breathing and all that to do with the respiratory system which has been proved beyond all reasonable doubts. It is also to do with the immune systems of the body and there is always a duality (more than one) of the subjects in so many ways. Rahu will be moving (backwards since it is always retrograde) to the previous sign Taurus by Sept 19, 2020. Taurus is an earthly fixed sign and receives the 5th aspect of Jupiter from Capricorn and it will be conjunct Saturn.

Nevertheless, both Jupiter and Saturn get retrograde by the end of May and that can never be the reason to presume, just like that, and make **sweeping statements as widely circulated in the social media**. *As summarized by me in Part 1, I am of the firm opinion that by the dates which are clearly and explicitly defined by me with supporting transit charts, the intensity and effects will die down, surely. This is the dire need of the hour for the entire humanity. I have not said a single word about the future of this pandemic. In this part of the article, I am venturing into sharing my views about the aftermath of the pandemic.*

Astrological predictions by virtue the pathology of Astrology, calls for a good blend of Astrology knowledge, experience over a long period of time with a touch of clairvoyance. The trinity of these factors cannot be considered in isolation of each other, and a holistic and balanced approach is very essential. Book knowledge should not be interpreted, verbatim.

Instead of reeling out stories with assumptions and presumptions, it is best to analyze the subject with facts and figures, supported with relevant transit chart based on historical data of the events which have been experienced by humanity. The epicenter of the discussion is revolving around Rahu, the causative planet, of course, considering the signs in which Rahu has transited in the past, should give insight and credibility for the discussion.

Well, after having stated as above, it is imperative to share with all of you, the road map of the next move of Rahu into Taurus on Sept 19, 2020 and what are the consequences, then. I propose to mention some historical facts about the killer viruses of the past and the possible future of the humanity and also mention a few salient points which I am pretty confident that majority of people will surely turn a deaf ear to that.

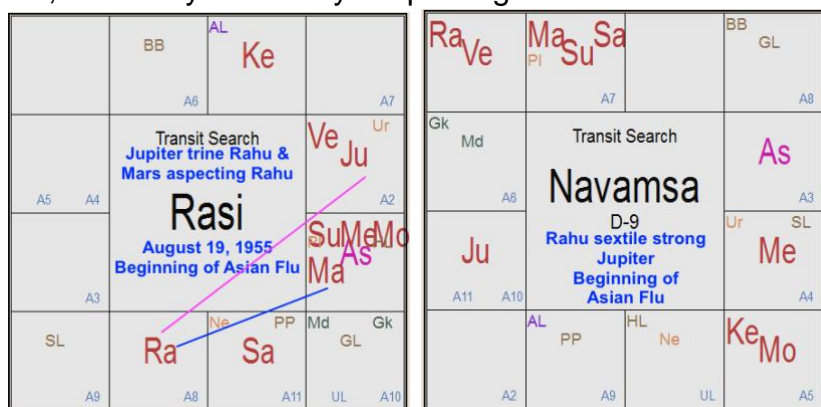

[A peep into the history of pandemics outbreak across the globe:](#)

Here, I will discuss selectively and in a limited manner directly to the point and refrain from a lengthy discussion and request you to treat as an abridged presentation. The Astrological perspectives of Rahu-Jupiter relationship, if harmonious in transit, is a sure shot of an outbreak of some epidemic or a pandemic depending upon the sign where they are transiting and the asterism as well. Those factors can very easily be predicted / forecast almost accurately, in fact, so to say very accurately with date and time stamp. In another article, I shall cover those points. I must alert or rather warn my readers, please do not get panicky on the planets viz., Jupiter-Rahu in your birth chart and never entertain negative thoughts and do not run up to Astrologers, including me (I have already mentioned in my earlier article also). Astrology has more to do with clairvoyance and metaphysical aspects, which will converge on the table of Astrological knowledge. The special factors mentioned above, I must admit that there are no barometers to quantify and therefore, they are the major values in deciphering either birth charts or general charts like the one on hand herein. I am now taking up 3 case studies of the past incidents of global pandemics and adducing Astrological evidence to prove my points.

[Case study No.1](#)

Asian Flu – 1955 -1958

I have zeroed-in on the position of Rahu then and looked at the placement of Jupiter. It is of great interest, Astrologically, to find again and again the mutual relationship between Jupiter and Rahu and of course, the trigger happy, Mars followed by the luminaries viz., Sun and Moon to start or stop an event. In this limited but objective analysis, I have not given much importance, but, notionally it is always impacting. The transit charts are given below:

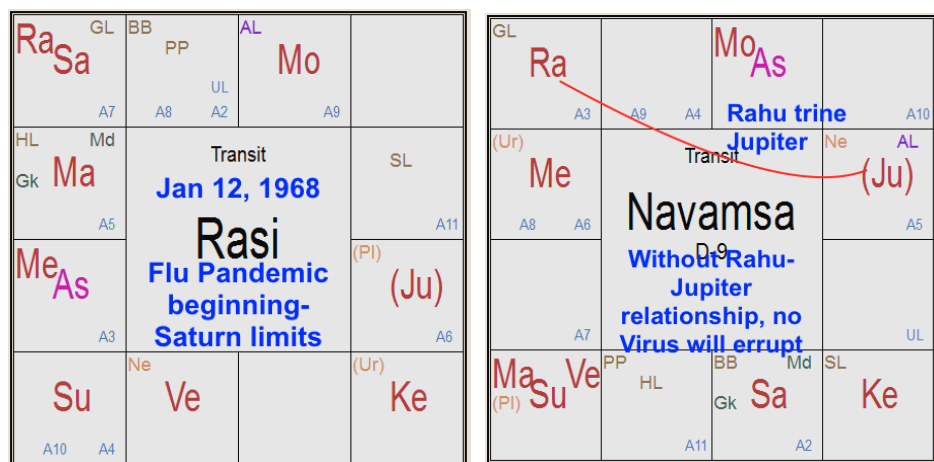

As already marked in the Rasi chart please note Jupiter – Rahu trine and in Navamsa also there is a very strong relationship and look at Mars triggering Rahu, that too from a fiery sign Leo with Sun posited there. Therefore, it is a very clear indication of the beginning of a deadly pandemic because both Rahu and Jupiter in a watery sign conjunct exalted Venus.

The pandemic again originated from a Chinese province of Guizhou and spread across the globe and, alas, took a death toll of 2 million people and in the US alone almost 70,000 deaths took place. It finally slowed down or died down by September, 1958.

We can notice the conjunction of Jupiter and Rahu in Libra and Sun in the 12th sign from there and signaling dissolution of the negative effects of an unholy relationship.

Case study No.2

Flu Pandemic – 1968

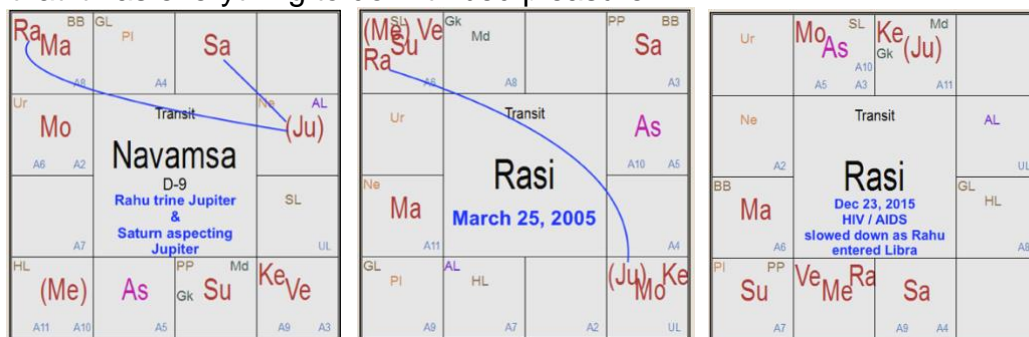

This pandemic did not go on for too long since Rahu was conjunct Saturn which limited the duration of the pandemic. This originated in Hong Kong and was known as Hong Kong Flu. Despite its short duration of spread, the death toll was over a million and in Hong Kong alone 500,000 people lost their life. However, it spread its wings in the

Philippines, India, Australia, Europe, and the United States but not with severe loss of life.

Case study No.3

HIV / AIDS at its peak between 2005 – 2012

At the outset it is to be noted that transit Rahu in Pisces, the 12th sign of the Zodiac indicates that it has everything to do with bed pleasure.

An estimated 36 million have lost their lives because of this pandemic since 1981. It is supposed to have originated in Saharan Africa and presumably around 21 million are still

suffering with this virus. With new treatment now available, the victims of this virus were able to continue to be productively living. As we all know, the reason for this virus is indulging in sexual enjoyment with or without protection. The Creator has fixed some limitations on humanity and once we cross that limit, we are bound to suffer.

The Astrological situation is again Jupiter-Rahu relationship in transit and even in the birth chart. Of course, the individual's suffering is quite different from mass suffering. Are there not healthy

people even amidst the worst situation of ongoing disaster of COVID-19? This means, each human being is having an independent destiny and it goes on. Thus, no need to panic, but we have to take all precautions not to contract the disease.

By December, 2015, the HIV / AIDS intensity had slowed down because of new innovative findings and medicine being found by extensive R&D. Yet, there is no way to cure the disease. With great difficulty, a patient can still hang on to life. If that is the achievement, it simply amounts to half-living and half-dead although some people are supposed to be productively engaged.

Well, all these developments are engineered to continue life whereas, the creamy layer of human life is lost, and it simply amounts to clinging to life with unbearable side-effects of medicines.

Why drag Rahu – Jupiter - Astrological and celestial relationship into the subject of Virus?

Let us admit the fact that the Creator is not a fool to have engineered the wonderful human body with such alacrity, with any ulterior motive to harass or cause disaster to humanity. The humanity is terribly suffering with on so many counts in every walk of life. It is just that some people are more comfortable in misery and some are less comfortable in misery. The common factor still remains the same – ‘misery’. I am not a sadist to see life in bad light at all. Having said this, there is huge discrepancy in the very philosophy of human life, unfortunately. The so called Spiritual Gurus and heads of big Spiritual Corporates are not disseminating the message that the very purpose of human life is for God realization. Why they don’t do that? They will never do it for the fear that they will not have followers at all, eventually.

The blunt truth said above is evident as to how Rahu – Jupiter Astrological and Celestial relationship causes great pain to humanity. Rahu, though a shadowy planet depicting a gamut of issues from adultery, bribery, corruption, all that is synthetic and non-organic, material gains, greed, happiness at any cost, right or wrong, science & technology and so on is primarily a shadow on human life tempting human beings and fueling their ambitions of all sorts. Saints, Mystics and Philosophers have been mentioning that this Universe is a big illusion. Nothing in this Universe is immortal and everything is temporary or mortal – all leased to us for a particular period of time.

Being absolutely and totally ignorant of the above points, we are all holistically engaged in Science and Technology and feel that ‘we are the masters of it’ and we never bother to care for the “Science of the Soul”. Have we ever thought – who are we, where did we come from, what are we doing and least bothered about ‘where are we going?’ None of us have the time to think or want to think about these points. A woman delivers a baby, and the baby happens to be a son or daughter and why did she get that particular baby and why only that? It is an act of shadowy planet Ketu – a mystery and thus the first star of the Zodiac is Ashwini, the lord of it is Ketu.

As the baby grows, it wants pleasure (Bharani the lord is Venus), it asserts its existence (Kritika the lord is Sun), it has its own mind and desires (Rohini the lord is Moon), it is aggressive trying to satisfy its desires (Mrigasira the lord is Mars), no matter right or wrong, it certainly wants to acquire what it wants (Aridra the lord is Rahu), it attempts and again and again, it justifies what it wants (Punarvasu the lord is Jupiter), then it is sad that it did not get what it wants (Pushya the lord is Saturn) and it will start bargaining with dual thoughts and sacrifices certain things to satisfy its desires (Ashlesha the lord is Mercury). The cycle repeats two more times in the same order

and by then it is a grown-up teenager and the same cycle keeps moving round and round. This is human life.

The Creator is absolutely right and he gives everything according to the actions of our previous life – which are all a bunch of mysteries, all represented by Ketu, the South node. The doctrine of Karma – as you sow, so shall you reap – is supreme. However, the North node Rahu is all the time demonstrating Truth in absolute terms and truly it is a planet depicting Spirituality and future, thus, connecting the past with the future.

It may, on the face of it, look like very big contradiction or conflict of interest when I say that Rahu depicts virus to the materialistic world when it is in harmony with Jupiter. Whereas, when it comes to Spiritual aspects of human beings, Rahu depicts Divinity. True to the core, when world encounters the killer virus, people engaged in Spirituality in the right direction get tremendous boost to their goal of God realization and every millimeter they move ahead, they will experience such trance beyond what the world can imagine.

The inference one has to draw from the para above is that calamities involving the Virus is an act of God with the sole purpose of reforming people to get them back to the aim and purpose for which we are given human birth as a gift of God.

It could be rather astonishing to note that the number of nerves in the body is 7 trillion (7,000,000,000,000). Virus attacks the immune system and the communication to glands is through the nerves to release certain fluids to fight the attacking virus.

Therefore, it is humanly impossible to find vaccines to prevent the attack of virus, but, the best what Researchers can do is already being done but not before the damage is already done. All these researches are generally futuristic and as they progress, human beings by their own unnecessary actions continuously create problems for themselves, unknowingly.

Change of food habits, lifestyle and so on should get priority and it is absolutely essential to resort to 100% vegetarianism, give up alcohol, cigarettes, drugs etc., as a matter of routine and practicing mind distancing by staying away from unnecessary entertainment of sorts. Daily meditation to focus our attention at the third eye or the Spiritual Gateway and raising our level of consciousness will go a long way to reduce our misery and keep ourselves away from several types of viruses in this universe. ***In conclusion, as the entire globe is now at the verge of finishing the encounter with the killer COVID-19, but only after drowning in the ocean of tears, I feel that this suggestion will receive due attention.***

In the next article, I propose to take a call on what happens when the much-debated Rahu enters Taurus on September 19, 2020.

K Jagadish,
